

### Technical parameters of the standard prefabricated house

<b>Earthquake resistance</b>	Grade 8
<b>Live load of corridor</b>	2.0kN/m <sup>2</sup>
<b>Live load capacity of roofing</b>	0.5kN/m <sup>2</sup>
<b>Wind resistance</b>	Grade 11 (wind speed ≤ 197.3km/h)
<b>External and internal wall heat transmission coefficient</b>	0.35kcal/hm <sup>2</sup> C
