Teknikal na parameter

| item                       | Detalye                                                                                                                                                                                                                      |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ang haba                   | Panloob na haba / panlabas na haba5.81m / 6.06m                                                                                                                                                                              |
| Lapad                      | Panloob na lapad/panlabas na lapad2.188/2.438m                                                                                                                                                                               |
| Taas                       | Panloob na taas/panlabas na taas2.410m/2.591m                                                                                                                                                                                |
| Pangunahing istraktura     | Banayad na bakal                                                                                                                                                                                                             |
| Roof                       | Sa labas ay 0.4mm kulay bakal bilang ang ibabaw, gitna ay 100mm glass wool pagkakabukod. Pinahihintulutang live loading0.75KN/m <sup>2</sup>                                                                                 |
| Wall                       | 50mm /75mm /100mm glass wool / rock wool sandwich panel, 0.4mm color steel sheet at 50kg/m <sup>3</sup> glass wool density sa loob.                                                                                          |
| Base                       | Ang panlabas na wainscot ay 0.3mm galvanized steel sheet metal, at ang insulation ay glass wool / rock wool. Ang supporting material ay 18mm cement Magnesium Fibreboard at ang panloob na dekorasyon ay 1.6mm PVC flooring. |
| Pinahihintulutang pag-load | 2 KN/m <sup>2</sup>                                                                                                                                                                                                          |
| Window                     | PVC sliding/casement window o Aluminum Window                                                                                                                                                                                |
| Pinto                      | Sandwich Panel door o Steel security door o glass door, nilagyan ng lock.                                                                                                                                                    |
| Opsyon Electric system     | Ibinigay ang plano, disenyo at konstruksyon                                                                                                                                                                                  |
| Teknikal na parameter      | water proof, Sound proof, fire prevention at moisture proof                                                                                                                                                                  |
