

Item	Content
Flexible combination	Our mobile house can be linked freely at length, width and height through the linking kits for bigger structure and different layout.
Fast installation	Four workers can erect it in 7~15 days.
Economic transportation	It will be loaded into shipping containers(main structure and panels in bulk, door/ceiling/floor tiles/furniture in cartons, sanitary/electrical/plumbing/hardware/fittings/tools in wooden cases).

Cost performance	It could be produced in mass production. Furthermore, it could be interchanged, replaced and maintained easily.
Energy saving	Choosing our new mobile house helps to save natural resources and energy as well as reduce industrial wastes.
Fireproof	According to test by national research center of testing techniques for building materials, our mobile house is a grade A1 non-combustible material which can withstand thousands of degree fire resistance test by flame gun on site.
Waterproof	It is with good water tightness. There is no deformation, expansion, shrinkage or damage after being exposed to water in a long time.
Good weather ability	It is against heat & cold as well as UV radiation. There is no crack after 50 freeze-thaw cycles.
Unlimited mold ability and creativity	Our mobile house is with strong artistic expression, showing different cultural values, any architecture style is available without increasing too much cost. It makes buildings and cities more wonderful.
